

BASINS SWAT Patches

It is extremely important that the patches for the SWAT software be loaded in the exact order and manner outlined in this document.

First install the BASINS software. This should install BASINS and the GenScn softwares. Next, you will download the patches folder found on the SWAT website under software (http://www.brc.tamus.edu/swat/soft_links.html)

Patch installation:

- 1) Unzip the b3072502.zip file. There is an executable file (b3_072502.exe) that should be run.
- 2) Unzip swatextension.zip. The file inside (b3mo_swat.avx) should be extracted to the BASINS\etc\ext\models directory.
- 3) Unzip the swatexe.zip. The executable file inside **SHOULD NOT BE RUN** at this time. Instead extract the file to the BASINS\models\swat\prog directory.
- 4) Unzip swatdatabase.zip. The entire contents of this zip file should be extracted to the BASINS\models\swat\database directory.
- 5) Unzip the webextr.zip file and run the setup.exe file inside.
- 6) Unzip the b3101603.zip and run the b3_101603.exe file.
- 7) Unzip the gww22.zip file and run the GenScnWinHSPF2.2.exe
