

JOB POSTING: Water Resources Modeler

Location: negotiable; remote available

POSITION:

Ecosystem Planning and Restoration, LLC, (EPR) has an open position for a part-time or full-time water resources modeler. We are looking for a dynamic individual with strong logistical, problem-solving, and water resources modeling skills; specifically focused on the use of the Soil and Water Assessment Tool (SWAT) model. Ideal candidates will hold an applicable degree and have a minimum of 2 years direct experience in SWAT modeling, watershed modeling, hydrologic assessments, and water quality assessments. Complimentary experience and expertise with other water resources simulation models will be beneficial. Must have good communications skills (oral and writing) and the ability to work effectively and collaborate in a multi-discipline team setting.

EDUCATION:

- Masters or PhD level in applicable degree program preferred.

EXPERIENCE/SKILLS:

- At least 2 years direct experience (graduate studies can be counted)
- Soil and Water Assessment Tool (SWAT) modeling experience
- Watershed assessments
- Hydrologic assessments
- Other simulation and analytical models
- Report writing

COMPANY INFORMATION:

EPR is a Small Business that was created in 2012 to be a premier environmental planning and ecosystem restoration company. EPR provides environmental planning, ecosystem restoration, and water resources engineering services throughout the United States with offices based in the East and Gulf Coastal regions. EPR's expertise is unmatched, and our unique blend of skills and experiences allow us to take a holistic view of problems, developing solutions that are based on past successes, innovative approaches, and leading research. We hire and retain top talent and focus considerable company resources on staff training and development.

EPR is a growing firm devoted to providing an exciting and diverse workplace for our staff. EPR has been ranked on the Inc. 5000 list of the fastest growing companies in the US numerous times (including 2025), rated a #1 Environmental Services Firm by Zweig White, and received several Best Place to Work Awards. We are devoted to providing an exciting and diverse workplace for our staff. We are committed to recognizing and rewarding our employees with an employment package that includes competitive compensation and comprehensive benefits such as paid time-off, 401(k) Match, health/life insurance and continuous professional development.

Job Type: Full-time preferred; Part-time available

Pay: Commensurate with experience and job type

Schedule:

- Monday to Friday, but negotiable for part-time.

Work Location: At existing EPR office, or remote work.
